Backend: NestJS, .NET (Clean Architecture), Spring Boot, Strapi, Firebase

DevOps & Deployment: Docker, CI/CD Pipelines, Nginx, Linux Server Administration, Azure Cloud Services, GitHub Actions

Platforms & Tools: Git, GitHub, Jira, Azure DevOps, Postman, REST APIs, Figma

Databases: PostgreSQL, MySQL, MongoDB, Firebase Firestore

Project Management: Agile/Scrum, Sprint Planning, Team Coordination, Stakeholder Communication, Timeline Management

Soft Skills: Problem-solving, Leadership, Communication, Quick Learner, Negotiation

WORK EXPERIENCE

Country Manager *April 2026 – Now*

Soprosys | Addis Ababa

- Managing cross-functional and operational teams across two countries.
- Working as Office Manager and Project Manager for multiple concurrent projects.
- Directing and executing all legal and administrative processes to establish the full corporate entity in Ethiopia.
- Managing New clients to the new company

Full Stack Developer and Odoo consultant *Sept 2025 – April 2026*

Soprosys | Djibouti

- Developed and maintained full-stack applications using React, Nextjs and NestJS, following clean architecture principles.
- Handled DevOps responsibilities including Docker containerization, and CI/CD pipeline setup.
- Developed and Maintained Odoo modules.

Full Stack Developer *Sept 2024 – Sept 2025*

Genesis AI Labs | Addis Ababa

- Developed and maintained full-stack applications using React, NestJS, and .NET, following clean architecture principles.
- Managed project timelines, sprint planning, and cross-functional team coordination to deliver scalable client solutions on schedule.
- Handled DevOps responsibilities including Docker containerization, CI/CD pipeline setup, and cloud deployment on Azure.
- Collaborated directly with stakeholders to gather requirements, define technical roadmaps, and ensure quality deliverables.

PROJECTS

E.D.G.E School Management System | *Full Stack Developer & Project Manager*

Led a 5-month development of a comprehensive school management platform using React and NestJS. Managed project timelines, coordinated team deliverables, and implemented core modules.

Dallol Talent Remote Job Platform | *Full Stack Developer*

Built a talent marketplace web application for the European market using React and .NET with clean architecture. Developed the full product from scratch alongside a teammate for a UK-based client.

Beep Call Service | *Backend Developer*

Developed a call service application using Spring Boot, implementing RESTful APIs, authentication, and real-time communication features.

Hotel Booking Widget | *Full Stack Developer*

Designed and built a full-stack hotel booking widget using React for the frontend and NestJS for the backend, with dynamic availability and reservation management.

Checkbook Printing Software | *Full Stack Developer*

Created an end-to-end checkbook printing solution with a user-friendly interface and backend processing for financial document generation.

Shair – Hair Salon Management App | *Full Stack Developer*

Built a mobile-first web application for salon management, including appointment scheduling, client records, and service tracking.

Team-Pulse Website | *Full Stack Developer*

Developed a company website using Next.js for the frontend and Strapi as the headless CMS backend.

Newsletter generator– N8n automation | *Automation*

Built N8n automation with content scraper, deduplication pipeline and content summarizer with optimized prompt. The client wanted to automate a newsletter on automobiles that were being done every 2 weeks. The automation built was able to scrape data from google, categorize the news, filter the duplicates from different sources, summarize the news and finally deliver the newsletter in a formatted pdf and html.

Meeting Notetaker– N8n automation | *Automation*

Built N8n automation that will take the meeting recording from the google drive then it will send it the voice recording into the agent pipeline where it will be transcribed, summarized and finally stored in a vector memory and Notion.

EDUCATION

Bachelor of Science in Software Engineering*Graduation: 2025*

HiLCoE School of Computer Science and Technology | CGPA: 3.83

CERTIFICATIONS & TRAINING

Microsoft Certified: Azure Developer Associate | 2024

Certified in developing cloud-based solutions on Microsoft Azure, including compute solutions, storage, and security.

Odoo Partner Bootcamp Training | 2024–2025

Completed partner-level ERP bootcamp covering system customization, module development, workflow automation, and enterprise business process integration.

ETCPC Computational Programming Competition | 2023

Participated and placed in the top 20% of all contestants in a national computational programming competition.
